

LIPOL DF

Degreasing enzyme

FEATURES

LIPOL DF is a polyenzyme suitable for degreasing any type of felt in place of traditional surfactants.

It is a neutral charge product that acts in the interfibrillary spaces of the felt by dissolving the natural fat accumulated during the pressing operations.

ADVANTAGES

- It is 100% biodegradable
- Its use does not dry or deteriorate the support where it is applied

TECHNICAL DATA SHEET

Description	LIPOL DF – Degreaser with esterase
Main components	Lipolytic enzymes, inorganic mineral substrates
Properties	Appearance: liquid Color: colorless Odor: odourless pH : 7.0 - 9.5 Formaldehyde: absent Pentachlorophenol (PCP) and / or derivatives: absent Cr (VI): absent Aromatic amines: absent
Package	Drum of 60 kg/120 kg with LIPOL DF label, or IBC Cube of 1000 Kg
Storage	It can be preserved for 12 months in intact packages. Store in a well-ventilated dry place, protected from heat sources
How to use	The product should be diluted 1: 5 in hot water (above 35 ° C) and applied to the felt at the minimum operating pressure and left to act for a minimum of 60 minutes.
